Candidate Journey Deck

"From Challenge to Career — The Gamified Path to Placement"

SLIDE 1: HERO SLIDE

Your Future Starts Here

Visual: Animated journey line showing progression from Explorer → Master with company logos (TCS, Flipkart, Amazon, Stripe, Google) at the end

Headline: "Complete The Challenge. Unlock Your Career."

Subheading: "Join 500+ CSE students earning real money while solving real problems. Get placed in top companies. Guaranteed.*"

Key Visual Element:

- Countdown: "10 weeks to placement"
 - Progress bar showing journey stages
-

SLIDE 2: THE PROBLEM (Why You Need This)

Why Traditional Campus Placement Fails You

Left Column — THE STRUGGLE:

- ❌ Resume gets ignored
Your 10-page resume = 6-second scan
- ❌ Interview is a lottery
One bad day = rejection
- ❌ No real-world experience
"2 years experience" means... what?
- ❌ Fake skills on resume
Companies can't trust credentials
- ❌ Months of job search
Uncertainty = stress

Right Column — THE REALITY:

🤖 What companies actually want:
"Show me your REAL code."
"Prove you can solve problems."
"Show me you can communicate."
"Can you ACTUALLY do this?"

📊 The Gap:
College skills ≠ Industry needs
Assessment ≠ Real work
Interviews ≠ Job capability

💼 The Cost:
₹10 lakhs wasted per bad hire
6 months training overhead
Mutual disappointment

Headline: "Interviews are broken. We fixed it."
