KARTHIKEYAN THIAGARAJAN

Senior Lead Software Engineer

Highly accomplished Senior Lead Software Engineer and Front-End Architect with 15+ years of experience, possessing deep expertise in Angular 16+/17, TypeScript, JavaScript, HTML5, CSS3, SCSS, and modern UI frameworks including ReactJS. Proven track record in leading front-end architecture and delivering scalable, responsive, and high-performance web applications. Skilled in responsive UI engineering, web performance optimization, REST APIs, and implementing CI/CD pipelines to build robust and optimized user experiences.

Core Competency

- Front-End Development
- Angular Expertise
- JavaScript & TypeScript
- UI/UX Engineering
- Web Performance Optimization
- RESTful API Integration
- Front-End Architecture
- Responsive Web Design
- CI/CD & DevOps Principles

Tools and Technologies

- Angular
- React
- JavaScript
- TypeScript
- HTML
- CSS
- UI/UX
- REST APIs

Relevant Industry Experiences

- Led front end architecture for enterprise applications using Angular 17, SCSS, Angular Material.
- Delivered high performance UI for Citi resource management platform.
- Built modern, scalable UI features using Angular and React.
- Delivered responsive, optimized UX across digital platforms.
- Developed high performance notification dashboards and UI components.

Educational Qualifications

- B.Sc. Computer Science, Bharathiar University, (1993)

Achievements & Certifications

- Led front-end architecture for enterprise applications using Angular 17, SCSS, and Angular Material, delivering high-performance UI for Citi resource management platform.
- Built modern, scalable UI features using Angular and React, delivering responsive and optimized UX across digital platforms.
- Developed high-performance notification dashboards and UI components.
- Built UI for Akita security & compliance SaaS platform.

- Delivered IoT enabled dashboards for smart building systems.
- Due to insufficient data, a detailed list of certifications cannot be generated. Please modify this placeholder to better reflect your certifications. Suggested areas to include are the certifications you've earned, the issuing organizations, and the years you obtained them.

Projects Worked on at Virtusa

Citi - Resource Management Platform - Banking - May 2023 to Dec 2025	
Role	Senior Lead Software Engineer
Technology	Angular 17, SCSS, Angular Material, TypeScript, JavaScript, HTML5, CSS3, REST APIs, UI/UX
Description	Led front-end architecture for enterprise resource management applications for Citi, delivering high-performance and scalable UI using Angular 17, SCSS, and Angular Material.
Relevant Industry Experiences	• Led front-end architecture for complex enterprise applications leveraging Angular 17. • Designed and implemented high-performance UI solutions, improving application responsiveness. • Utilized SCSS and Angular Material to build scalable and modern UI frameworks. • Ensured responsive design and optimal user experience for critical resource management platform. • Contributed to delivering a scalable web application for a major financial institution.

Experience Prior to Virtusa

Buckman - Digital Platforms UI/UX - Digital Innovation - May 2021 to Mar 2023	
Role	Senior Digital Innovation Engineer
Technology	Angular, React, TypeScript, JavaScript, HTML5, CSS3, Responsive Design, UI/UX
Description	Built modern, scalable UI features and optimized user experiences across various digital platforms using Angular and React, ensuring responsive and high-performance web applications.
Relevant Industry Experiences	• Developed modern and scalable UI features leveraging Angular and React frameworks. • Delivered responsive and optimized user experiences across diverse digital platforms. • Engineered solutions for enhanced UI/UX in a fast-paced innovation environment. • Applied expertise in modern UI frameworks to build robust web applications. • Focused on creating high-performance and user-centric interfaces.

PushPro - Notification Dashboards & UI Components - Digital Notifications - Jun 2020 to Mar 2021	
Role	Senior Frontend Developer
Technology	JavaScript, HTML5, CSS3, Modern UI frameworks, Responsive Design, Web Optimization
Description	Developed high-performance notification dashboards and reusable UI components, ensuring optimized user experience and responsiveness for a digital notification platform.

Relevant Industry Experiences	• Developed and implemented high-performance notification dashboards and interfaces. • Engineered reusable UI components for efficient application development. • Focused on optimizing UI performance for enhanced user engagement. • Applied front-end expertise to deliver intuitive and responsive interfaces. • Contributed to the development of scalable web applications.
-------------------------------	---

Auriss Technologies - Akita Security & Compliance SaaS Platform UI - Security & Compliance - Oct 2017 to Feb 2020

Role	Senior Frontend Developer
Technology	JavaScript, HTML5, CSS3, Modern UI frameworks, UI/UX, Responsive Design
Description	Built user interfaces for the Akita security and compliance SaaS platform, focusing on robust, user-friendly, and responsive web applications for enterprise clients.
Relevant Industry Experiences	• Developed user interfaces for a critical security and compliance SaaS platform. • Ensured robust and user-friendly UI development for enterprise solutions. • Contributed to the front-end of a scalable SaaS application. • Utilized modern front-end practices to enhance platform accessibility and usability. • Designed and implemented responsive UI components for complex data presentation.

Pacific Controls - IoT Enabled Smart Building Dashboards - IoT/Smart Systems - Feb 2015 to Oct 2016

Role	UI/Web Developer
Technology	JavaScript, HTML5, CSS3, Modern UI frameworks, Responsive Design, UI/UX
Description	Delivered IoT-enabled dashboards for smart building management systems, focusing on data visualization, interactive user interfaces, and responsive web development.
Relevant Industry Experiences	• Developed and delivered IoT-enabled dashboards for complex smart building systems. • Designed and implemented interactive user interfaces for real-time data visualization. • Focused on efficient data presentation and responsive design for monitoring applications. • Applied UI/Web development skills to integrate with IoT platforms. • Contributed to building scalable and high-performance web applications in the IoT domain.
